DERIVATIVES MARKET LEGAL EXPERT

DUTIES

- The derivatives market legal expert supports the Bank's front office in the structuring and monitoring of its forward financial instrument transactions as well as structured products for all types of underlyings (interest rates, foreign exchange, credit, etc.), mainly in an ISDA or FBF environment.

- Main duties include:
 - Supporting the "issuance" and "securitization" departments with respect to derivatives that are included in structured transactions.
 - Work with finance legal experts on the structuring of financing hedges.
 - Advise the back office in the drafting and validation of derivative products and settled repo transaction confirmations.
 - Monitor certain cross-functional projects and participate in financial market working groups (ISDA or FBF) in order to establish a legal watch related to the documentation of derivatives.
