

CREDIT RISK ANALYST

DUTIES

- The credit risk analyst contributes to all credit analysis work for a given sector (aviation, real estate, telecoms, oil, etc.)
- The main duties consist of producing credit analyses under tight deadlines and providing recommendations regarding new requests from the business lines and/or transaction reviews.
- He/she conducts business and financial analyses of counterparties in his/her sector and presents and supports these recommendations in committees.
- He/she analyzes and validates finance and market transactions, giving consent after the risks incurred by Natixis have been assessed and making appropriate recommendations. He/she monitors the transactions in the systems.
- He/she participates in internal methodological risk assessment developments. He/she suggests ratings and ensures the annual updates to ratings and commitments for the corresponding sector.
