

PORTFOLIO MANAGER

DUTIES

- The portfolio manager participates in the implementation of the investment strategy defined for each portfolio and manages the capital assigned to him/her. He/she makes decisions regarding financial markets in order to grow managed assets (OPCVM, SICAV and FCP mutual funds) and optimize their performance, based on legal and risk constraints.
- The manager is also responsible for the client relationship as part of the portfolio management: he/she presents the management policy and may participate in supervisory board meetings and management committees of OPCVM/FCP mutual funds.
- He/she participates in presentations of products held in funds and presents the products to the sales force and clients.
- He/she studies proposed new funds and new company savings plans.
