Natixis Interépargne launches the first online employee savings application for tablet

Natixis Interépargne launched today a new version of “Mon Epargne Salariale” for tablet (and smartphone) to manage your employee savings on line.

Available on iOS and Android, both for smartphone and tablet, the new version of “Mon Epargne Salariale” was improved with new functions and enhanced interface.

Users can now manage their employee savings anytime and anywhere. This application demonstrates Natixis’ capacity to match its digital services to the behavior and expectations of savers. A survey performed in 2013 by Opinion Way for Natixis Interépargne showed that 89% of the “Mon Epargne Salariale” users wished to manage their savings from their tablet.

The dashboard, your savings at a glance

As soon as users open the application, the dashboard provides a global view of their savings: total savings, breakdown between savings that are available and savings that are blocked, top 3 funds invested, latest operations, alarms and messages.

Everything on your savings

User-friendly with interactive graphs, the application provides information on amounts by product, by fund and available date, investment gains or losses, social contributions in case of payment, the performance of each fund (for a given length or date), or the transaction history.

Carrying out transactions

“Mon Epargne Salariale” is the first tablet and smartphone application that enables users to carry out secure transactions on their employee savings account: choice of investments, answering the option form regarding profit-sharing or incentives, etc.
