

The Green Weighting Factor in Brief

An unprecedented

- mechanism that allocates
- **capital** to financing deals on a
- trajectory consistent with the
- objectives of the Paris
- Agreement on climate change

Each financing

transaction is assigned an environmental

rating corresponding to its impact on the climate and the environment

profitability of financing transactions

- Each green transaction receives
 - a positive adjustment
- Each brown transaction receives a negative adjustment

Active balance sheet management to promote the transition of the

economy
